

CIVIL & STRUCTURAL ENGINEERING

From **CONCEPT** to **COMPLETION**, we have the In-House capability and experience to meet all your requirements.

Whether you need a full scope on a multi million pound project, or a few hours of support, our broad field of experience ensures we understand client needs and specific industry requirements.

Our Design capability is focused around the use of the latest tools such as Autocad 3D, Tekla and Navisworks.

We deliver maximum value to our clients by undertaking the procurement and management of civil and structural construction contracts.

Addison have developed specialist 'Cut & Carve' techniques to ensure complex plant modifications minimise operational disruption.

Capabilities include:

- Civil / Structural Design and Detailing
- Structural Surveys / Condition Reports
- Structural Analysis / Calculations
- Feasibility Studies and Cost Estimates
- Site Dimensional Surveys
- Topographical Surveys
- Lifting Surveys
- Planning & Building Control Approvals
- Enquiry & Construction Specifications
- Construction Support
